

INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY, AUGUST 17, 1994 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL V

Current Situation: The Northern Rockies, Eastern Great Basin and California experienced increased fire activity. Type I Incident Management Teams were mobilized in the Eastern Great Basin and California; Type II Incident Management Teams were mobilized in the Eastern Great Basin, California and the Northern Rockies. Seven crews were mobilized from the Eastern Area to the Northern Rockies.

The 1st Battalion, 5th Marine Regiment, 1st Cavalry Division, has been reassigned from the Tyee fire in the Northwest to the West Koozanusa Complex in the Northern Rockies. Deployment will occur today.

Colonel Anthony Palermo USMC, is the Task Force Commander of the two Marine Battalions assigned to the Tyee fire and the West Koozanusa Complex. Colonel William T. Maddox, USA, is the Task Force Commander for three Battalions and one Aviation Battalion assigned to the Corral Creek and 17 Mile fires and the Idaho City Complex.

Eastern Great Basin Area Large Fires:

CORRAL CREEK, Payette NF. A Type I Incident Management Team (Johnson) is committed. The 14th Engineer Battalion, (Lt. Col. Perrenot, Commander) is committed. Helicopter support is being provided by the 4th Battalion, 227 Aviation Regiment, 1st Cavalry Division, USA (Lt. Col. Myles, Commander). Line construction began from upper Payette Lake to the south end of the fire. Successful burnout operations on the west flank should help slow the fire spread. Fire activity was not as intense yesterday; however, short range spotting and torching did occur.

BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Birch) is committed. This is a unified command with Idaho State Department of Lands, represented by Bill Williams. The complex is comprised of the BLACKWELL and 10 smaller fires. An inversion layer combined with downslope winds during the night caused significant runs yesterday and hampered helicopter operations until late in the day. The threat of structure loss continues at Burgdorf and Secesh.

IDAHO CITY COMPLEX, Boise NF. A Type I Incident Management Team (Liebersbach) is committed. The 20th Engineer Battalion, 1st Cavalry Division, USA (Lt. Col. Bruce Porter, Commander) is committed. The complex consists of the BANNOCK, BEAR RIVER, RABBIT CREEK and NORTH FORK fires. Extreme burning conditions continued, with 200 foot flame lengths reported. Current threat is to structures at Barber Flat, Sunset Lookout and numerous timber sales in the vicinity.

THUNDERBOLT, Boise NF. A Type II Incident Management Team (Butler) is committed. A Type I Incident Management Team (Denton) has been ordered. Helicopter support is being provided by the 4th Battalion, 227 Aviation Regiment, 1st Cavalry Division, USA (Lt. Col. Myles, Commander). The fire escaped containment lines to the north and east and crossed Roaring Creek, forcing crews to utilize safety zones.

yesterday.

PRIEST LAKE COMPLEX, Idaho Panhandle NF. A Type II Incident Management Team (Kechter) is committed. Crews were able to direct attack the fire due to favorable weather conditions. Line construction began on the Mankato fire.

BITTER-NEZ, Bitterroot NF. A Type II Incident Management Team (Bullis) is committed. The complex consists of the SADDLE, MAGRUDER, NICK and SAWTOOTH fires. The Wahoo fire was turned over to the Nezperce NF yesterday. Acreage increase is due to burnout on the Nick and better mapping of both Nick and Magruder.

ST. JOE COMPLEX, Idaho Panhandle NF. A Type II Incident Management Team (Hart) is committed. The 1956 N fire grew to 100 acres, mostly due to material rolling on steep slopes. The fire is burning in heavy, continuous fuels with few natural barriers.

FREEZEOUT, Clearwater NF. This fire is in confinement strategy; however, significant activity has occurred on this incident. Public advisories have been issued for heavy smoke along Highway 12. A meeting has been held with cooperating agencies to deal with safety concerns at Powell and along Highway 12. Contingency plans for public safety along the Lochsa River, state complexes and Powell Ranger Station are being developed. Although the fire is 8 miles from Powell and there is no immediate threat to property, structure protection specialists have been requested from Missoula Rural Fire Department to plan for structure protection. Retardant was utilized to protect Bear Mountain Lookout. Safety in the back country, in campgrounds, and along the highway are also primary concerns.

Northwest Area Large Fires:

TYEE COMPLEX, Wenatchee NF. A Type I Incident Management Team (Maupin) is committed. The 5th Battalion, 11th Marine Regiment (Lt. Col. Rick Lindsey, Commander) is assigned. Burn out operations continue; the progress is slow but effective.

SNAKE RIVER COMPLEX, Wallowa-Whitman NF. A Type I Incident Management Team (Bailey) is committed. Three CH-47 helicopters from the 214th Aviation Unit, USAR, Fort Lewis, WA are assigned. This complex is comprised of the RAPID RIVER, SADDLE CREEK, HAAS HOLLOW, and SWAMP CREEK fires. The fire pushed by

15-20 mph winds, caused the Rapid River fire to jump Bridge Creek and spotted to Cannonball Mountain and Saddle Camp. Ash fall has been noted up to eight miles from the northeast perimeter of the fire.

BOUNDARY, Wallowa-Whitman NF. A Type I Incident Management Team (Shaw) will transition on 8/18. The first big break for this fire came yesterday with the decrease in winds and effective burnout operations. Eight helicopters and an additional 200 Oregon Department of Forestry personnel were utilized in suppression efforts. Structure protection continues for the Tower Mountain area.

HATCHERY COMPLEX, Wenatchee NF. A Type II Incident Management Team (Furlong) is committed. Five CH-47 helicopters from the 214th Aviation Unit, Fort Lewis, WA are assigned. The complex is comprised of the ALPINE LAKES, HATCHERY, RAT CREEK and WILDERNESS fires. The Blackjack 1,2,3, and Escondito fires were not as active. The accessible areas of the Hatchery and Rat fires are well into mop-up status.

OKANOGAN COMPLEX, Okanogan NF. A Type I Incident Management Team (Monahan) is committed to the Boulder fire. The complex is comprised of the RAINBOW/BOULDER/BUTTE, POORMAN, BURNT SAW, FALLS CREEK and MISC. ABC fires.

North Zone - California Large Fires:

COTTONWOOD, Tahoe NF. A Type I Incident Management Team (Dougherty) is committed. The fire has split into two heads; one is running to the north/northeast towards a subdivision and the city of Loyalton and the other is running to the east/northeast towards Sardine and Babbitt lookouts. Evacuation briefings were in progress at the time of the report. The fire started along Highway 89 and a portion of the highway 13 miles north of Truckee has been closed.

FISH, Mendocino Ranger Unit, California State. The fire is located northeast of Gualala on Fish Rock Road on the northern California coast. The fire has destroyed a yarder and dozer and is threatening timber, ranches and a christmas tree plantation.

DILLON COMPLEX, Klamath NF. A Type II Incident Management Team (Caves) is committed. This complex is comprised of the JACK/XX/CEDAR, KELSEY/WILLIS, HARRINGTON/DIVIDE and 16 other contained fires. The west flank of the fire continues to burn. Deep canyons and smoke considerations are making the use of airtankers ineffective. Burnout operations are continuing.

South Zone California Large Fires:

41, San Luis Obispo Ranger Unit, California State. The threat to Atascadero and San Luis Obispo has subsided somewhat due to lighter fuels, receding winds and rapid deployment of resources. Evacuations have occurred in the Serrano Ranch, Summit Hills, Tasajara Creek, Design Village, Santa Margarotee, Garden farms and numerous other areas within the proximity of the fire. Highway 41 between Morro Bay and Atascadero and Highway 101 between San Luis Obispo and Atascadero are closed.

HEATON, Angeles NF. A Type II Incident Management Team (Cooney) is committed. No problems are anticipated.

Outlook: Strong high pressure will be centered over the four corners area and will increase monsoon moisture. This will bring increased humidities and scattered thundershowers to Arizona, extreme southern Nevada and southern Utah. Widely scattered afternoon and evening thundershowers will persist over eastern Utah, western Colorado and western Wyoming. Isolated thundershowers will occur in extreme southern California. A dry westerly windflow will persist over the pacific northwest and the northern intermountain region. Fire activity is expected to continue in the Northern Rockies, Eastern Great Basin and California with heavy resource mobilization, especially to the Northern Rockies and Eastern Great Basin.
